

US ARMY FINANCIAL MANAGEMENT COMMAND

**MILITARY
PAY**

Active Component (AC) DJMS

United States Army Financial
Management Command
Operational Support Team

Mission

What is the mission of the Military Pay Office?

The mission of the Military Pay Office is to provide timely and accurate pay services to America's Armed Forces.

Intro to Defense Joint Military Pay System (DJMS)

Learning Objectives:

-  Learn how to access DJMS.
 -  Learn the different functions within DJMS.
 -  Learn what the MMPA is and how it is used.
-

ACCESS TO DJMS

Access to DJMS is restricted to authorized users to:

Safeguard personal information.

Ensure system security and data integrity.

Prevent unauthorized use, and system sabotage.

ACCESS TO DJMS

-  You will be given training on system security prior to authorization to access DJMS.
 -  Access to the system is granted via a completed DD Form 2875 System Authorization Access Request (SAAR) and a DD Form 2875 Continuation Sheet
 -  Access to DJMS is through Defense Information Systems Agency (DISA), Multi-Host Internet Access Portal (MIAP) - MIAP is a DISA solution whose goal is to provide a secure web based access to meet the needs of customers.
-

What is the MMPA?

THE MMPA IS:

-  A record of all actions that affect a member's Pay and Allowances.
-  A history of entries during the current plus eleven (11) preceding months.
-  A record of Entitlements, Leave, Address Information, Allotments, Taxes, and Administrative Data.
-  Created by an Accession Transaction.
-  One of many tools used to answer Inquiries, make

MMPA Purpose

MMPA Contains current and historical data as well as historical data pertaining to a member's pay.

MMPA provides payroll ledger.

MMPA Header Information

☛ The second line of an MMPA provides help or “hot key”

information on maneuvering in the MMPA query screen.

☛ The third line is where the Privacy Act statement appears.

☛ The fourth line covers some items that are needed to quickly

verify that you have the correct member’s MMPA.

☛ The fifth line provides quick reference to items that are

found in the body of the MMPA under the same FID.

ORGANIZATION OF THE MMPA

 The MMPA is organized in several different ways.

-  First the MMPA is organized into six groups.
-  The MMPA is also divided into 15 categories of entries.
-  Each entry in the MMPA is listed by Format Identifier (Format-ID or FID).
-  Each entry consists of data fields that are called Data Use Identifiers or DUIs.

ORGANIZATION OF THE MMPA

 The six (6) Groups of the MMPA are:

-  Fixed Group
-  Variable Open Group
-  Closed/History Group
-  Futures Group
-  Suspense Group
-  LES Remarks Group

NOTE: The Fixed, Variable Open, Closed/History Groups are combined and listed together under the heading "FIXED/OPEN/HISTORY" ~~when the MMPA is displayed~~

MMPA - FIXED ENTRY GROUP

Entries are present and appear on all member's MMPA.

Group contains all administrative data pertaining to the member.

Entries are always open entries.

Superseded entries moved into the closed history group.

MMMPA - VARIABLE OPEN GROUP

- ☛ Alphabetical order after the fixed entries in each category.
 - ☛ Entries are only present when they are in effect.
 - ☛ Entries are open and currently in effect and readily changing.
 - ☛ Entries are currently applicable to the member's record.
 - ☛ Entries usually contain an open entry date and start date.
-

MMPA – CLOSED/HISTORY GROUP

 This group contains three types of data:

-  Entries established by report transactions that have processed during the current month.
-  Entries which are fixed or variable open which have stopped, changed, been corrected or cancelled during the current month.
-  Historical data which is kept for eleven months after the month in which it was placed in the Closed\History group.

 Entries in this group are listed alphabetically and numerically by FID within category, then FID chronologically by date closed.

 Close entries are differentiated from Fixed and Variable Open entries by a dash (-) following the FID.

Open and Closed

Entries

Closed entries represent transactions that do not affect future months' pay.

MMPA – FUTURES GROUP

 This Group contains data related to specific actions that are known to be required at a specific time in the future.

 When the date in the entry is reached, the action occurs.

 They contain the same FID as the entry they pertain to.

 Entries in the category are designated and sequenced alphabetically and numerically by their FID.

Future

MMPA - SUSPENSE GROUP

 This group contains data pertaining to an action which cannot be completed without additional input or information.

 A reject or management notice is normally generated to the servicing ADSN to inform them of the need to make additional input.

 The codes in each entry determine what action is necessary or what information is needed.

Suspense

LES – REMARKS GROUP

-  This group contains data used to produce remarks on the LES that identify actions taken against the MMPA during the processing month.
 -  These entries are hard coded into DJMS, and there is no cross reference table to determine what remark will be printed on the LES.
 -  They are used to generate remarks on the printed monthly LES.
 -  After month-end-restructure (MER), these entries are removed from the MMPA.
-

MMPA - GROUP CATEGORIES

MMPA has 15 categories:

- ALL= All
- A = Allotments
- B = Leave
- C = Collections
- D = Deductions
- E = Entitlements
- F = Tax entries
- H = Held Pay
- L = Locations
- M = Member ID
- N = Memos
- P = Pay Comp
- R = Reenlistment
- S = Status
- T = Pay Dates
- FUT= Futures
- SUS= Suspense
- LES= Leave & Earnings

Format Identifiers (FIDs)

IS THE "LANGUAGE" OF THE MASTER MILITARY PAY ACCOUNT (MM)

The FID is a two character, alpha, numeric, or alpha-number code, which identifies the type of transaction or entry. The first character of the FID identifies the transaction or entry category.

The second character of the FID further defines the transaction or entry type within the category. For example, the first category is allotments. The system contains 14 types of allotments, identified by the second character of the FID.

Format Identifiers (FIDs)

36

An exception to the FID rule applies to

entitlements. Entitlement FIDs are made up of two numeric characters. These characters cannot be broken down to describe the entry. These characters must be viewed as one number to identify the transaction type.

FIDs

Alpha Character

ALLOTMENTS

 SOME COMMON ALLOTMENT FIDs ARE:

-  AV - NR OF ALLOTMTS
 -  Indicates the number of open allotments.
 -  AZ - ALOTMT FLASH
 -  Indicates whether allotments will process or if member is pending separation or retirement.
 -  AB - BOND ALLOTMENT
 -  AC - CHARITY ALLOTMENT
 -  AD - DEPENDENT SUPPORT ALLOTMENT
 -  AH - MORTGAGE PAYMENT ALLOTMENT
 -  AI - INSURANCE ALLOTMENT

TOUR \ SERVICE \ ENLISTMENT ENTRIES

 Both Transaction and Entry FIDs.

 Used primarily to Report or Record dates and time periods associated with the member's term or service or type of tour.

 Also used to report or record certain special compensation positions, and dates associated with career incentives.

 Many are system generated as a result of other type transactions.

ENTITLEMENT ENTRIES

-  Entitlement entries are primarily numeric FIDs.
 -  All pay and allowances that the member is currently entitled will be in this category.
 -  Both transaction and entry FIDs.
 -  Generated by and input at all levels of processing.
 -  Unique transactions are included in this Group.
-

FIELDS WITHIN FORMAT INDICATORS

-  FIDs consist of fields known as Data Use Identifiers (DUI).
 -  Fields contain the actual data that is unique to each MMPA.
 -  Fields vary in size as well as configuration depending on the FID and its category and group.
 -  Not all fields are shown or used for each FID
 -  The MMPA Content Book is the reference, which gives a list of all of the DUI codes.
-

DATA USE IDENTIFIERS (DUI)

Some commonly used Data Use Identifiers are:

-  FORMAT-ID = FORMAT IDENTIFIER
-  ACTN = ACTION INDICATOR
-  ENTLMT = CURRENT MONTH TOTAL ENTITLEMENT
-  ENTLMT-MM = CURRENT MONTH MID-MONTH ENTITLEMENT
-  ENTLMT-NM = ENTITLEMENT NEXT MONTH
-  CNTRL-CODE = CONTROL CODE
-  ENTRY-OPEN-DT = ENTRY OPEN DATA
-  ENTRY-CLSD-D = ENTRY CLOSED DATA
-  START = START DATE
-  STOP = STOP DATE

ACTION INDICATOR (ACTN)

-  Alpha-numeric or numeric codes used on input transactions and shown on the MMPA when the entry is the result of the transaction being input.
 -  Used to tell the system what action is to be taken on a transaction.
 -  Can be input by coders or system generated.
 -  The Action Indicator consists of an event code in the first position which indicates what type action generated the entry.
 -  Input transaction Action Indicators will normally have an event code of zero (0).
-

Action Indicators

Action Indicator	Description
01	Start
02	Stop
03	Report
04	Change
05	Correct
06	Cancel
07	Increase
08	Decrease

The above listing are the most common action indicator codes.
There are over 50 codes.

AB01

The characters are defined as follows:

CHARACTER	CODE	DESCRIPTION
A	Category	Identifies the type of transaction- Allotment
AB	Format identifier (FID)	Further defines the category type- bond
01	Action Indicator	Identifies the action required, such as stop and start - start bond allotment.

Action Indicator G1 - Started By PCS
Arrival

Event Codes

The event code tells the status or event transaction that processed, created, or updated the entry with a system generated transaction.

Event Code

The first digit is the category identifier of the transaction that generated the entry, and the second digit identifies the action taken.

Action Indicator	Description	Legend
E1	Computer generated by the accession transacton	E = Accession Transaction 1 = Start
Z4	Computer generated by a mass rate change (pay raise, etc.)	Z = Mass Rate 4 = Change
B3	Computer generated by a leave transaction	B = Leave other than excess 3 = Report

Event Codes

 **The first digit is the category identifier of the transaction**

that generated the entry, and the second digit identifies

the action taken.

 **The second character is the second character from the**

action indicator

table.

CONTROL CODE (CNTRL-CODE)

A one character code that identifies when an MMPA entry is open, closed, suspended, or has previously been corrected or cancelled.

Control Codes ***CNTRL-CODE***

0 = Open entry in MMPA

1 = Open MMPA entry suspended for

indebtedness

2 = Closed entry that affects pay

3 = Entry used to correct an overpayment in a prior pay period. Used only when

DFAS makes the correction

Control Codes CNTRL-CODE

4 = Entry used to correct an underpayment

in a prior period. Used only when DFAS

makes correction .

5 = MMPA entry used to cancel a prior

transaction that results in recoupment of an

entitlement that

has been paid. Original

computer processing code is changed to 5.

Control Codes ***CNTRL-CODE***

6 = Closed MMPA entry which was corrected and does not affect pay currently.

9 = Identifies a period of time that member did not have this MMPA entry in effect due to status.

Control Codes (Con't)

ENTRY OPEN DATA (ENTRY-OPEN-DT)

An eleven character code that identifies the date that a particular entry was entered on the account. The eleven characters are broken down as follows:

Calendar Date = The actual calendar date (YYMMDD) the transaction accepted on an update to create, open or report the entry.

Update Cycle: Two characters identifying the update number on which a transaction was opened for the particular processing month. (Exceptions are: 96- Created by conversion, 98- Created by MER, 99- Created by Mass Rate Change.)

Processing Month: Two characters (01-12) identifying the processing month the transaction affected.

Mid-month Flag: One character, used to identify if the transaction affected the mid-month (1) or end-of-month (2) pay.

ENTRY CLOSED DATA (ENTRY-CLSD-DT)

An eleven character code that identifies the date that a particular entry was closed on the account, stopped being in effect, or created as a history entry. The eleven characters are broken down as follows:

Calendar Date = The actual calendar date (YYMMDD) the transaction accepted on an update to close, stop or report the entry.

Update Cycle: Two characters identifying the update number on which a transaction was opened for the particular processing month. Exceptions are: 96- Created by conversion, 98- Created by MER, and 99- Created by Mass Rate Change.

Processing Month: Two characters (01-12) identifying the processing month the transaction affected.

Mid-month Flag: One character, used to identify if the transaction affected the mid-month (1) or end-of-month pay (2)

Data Organization

Each transaction creates at least one entry to the MMPA. The MMPA contains several lines of pertinent information, for example, the date the transactions processes on the MMPA. The MMPA is organized by fixed entries, then variable (alphabetically).

Reading the MMPA

Now lets discuss how to read the codes within the MMPA entries and use the information the codes provide to interpret the transaction that have been processed on a member's MMPA.

Reading the MMPA

- ✓ Allotment (Dependent Support)
 - ✓ Federal Tax Withholding Status and Exceptions claimed
 - ✓ Payroll Payments
-

Reading the MMPA

The first example is an open and closed dependent allotment :

Reading the MMPA

Each MMPA contains the current plus eleven previous months data. The format identifiers used to provide payroll payment information are:

PH- provides the 11 previous months' end-of-month payments

PN - provides the 11 previous months' mid-month payments

PU - provides the current month mid-month and end-of-month net payment amounts.

TDY/TCS for Non-PCS Moves

Upon reporting TDY/TCS process the following transactions:

 LD01 - Transaction allows the TDY location to submit DJMS transactions on behalf of the member. Also changes the servicing ADSN to reflect TDY/TCS ADSN.

 LG04 - Transaction allows the member to receive LESs, Net Pay Advisory (NPA), Direct Deposit system (DDS) and non-DDS payments.

 SC04 - Transaction updates the LES address file.

Structure of the Military Pay Office

🏠 Typical assigned to disbursing section
🏠 ECC - Eagle Cash Card

Questions??

Good Luck - - DJMS Will Work for
You ***LET IT HAPPEN!!!!!!!***
